

Fully Automated Foreign VAT Reclaim for Business.

Patented artificial intelligence technology maximizes operational speed & efficiency, resulting in up to 30% more in reclaimed VAT.

The VAT Market Today

Companies now spend an average of 5% of their total annual budget on foreign travel, with 4-10% of their spend eligible to be reclaimed through VAT.

More than \$20 billion of foreign VAT is left unclaimed by companies each year. Overworked accounting departments, misplaced invoices, complicated processes and global unawareness... all of these contribute to lost VAT-related revenues and inefficiencies for companies today.

WAY2VAT provides a fully automated end to end VAT reclaim solution. Our patented and revolutionary artificial intelligence technology and "AIA" (Automated Invoice Analyzer) capabilities enable automated VAT report generation, submission and recovery, resulting in simple, hassle-free VAT reclaims for your business and optimized integrity of your data.

Our solution connects via an API to your existing expense management system, analyzes recoverable VAT, and automates the reclaim process with a seamless submission to the tax authorities, generating hassle free VAT returns to your company.

Fully compliant with GDPR, the system has unique capabilities for fraud detection and anomaly alerts on top of VAT "claim-ability" detection and VAT risk analysis, with ever-changing tax regulations and rates.

Our revolutionary VAT solution provides:

- Full transparency
- A detailed breakdown of claims
- The ability to identify where lost VAT opportunities are
- Enhanced tax savings
- Lower compliance risk
- Full imaging and electronic document storage
- Streamlined operational efficiency

Fully Automated Foreign VAT Reclaim for Business.
